Culligan[®]

Soft Water Cleans Harder

Better Water Means Better Living.

*Discover all the benefits
of a cleaner, softer,
healthier, easier
way of living with
The Culligan Gold Series™
Water Softener.*

A solution to your hard water blues

From spending too much on laundry detergents and softening agents to constantly battling dry skin and dull, lifeless hair, you need the ultimate solution to your hard water problems: The Culligan Gold Series™ Water Softener.

Water that makes you feel good

Personal Care: Enjoy silky, shiny hair and cleaner, smoother skin. Baths and showers in soft water are a pleasure—the water actually feels better on your skin, and soap rinses right off, leaving you cleaner.

Softer Laundry: No more uncomfortable clothing. Laundry detergent residue rinses clean from your clothes, leaving them soft and supple against your skin. Towels are fluffier and absorb better; sheets and bedding feel soft and smooth.

Water that helps you live better

Easier Cleaning: Bathtubs, chrome fixtures, shower stalls and glass doors—everything cleans easier and stays clean longer because soft water doesn't leave that dull soap film.

Sparkling Dishes: Washed by hand or in a dishwasher, your glassware comes out spot-free, and your dishes, flatware, pots and pans come out squeaky clean and shiny new.

Brighter Wash: Laundry soaps work better in soft water to get clothes their brightest. Whites and colors will be more vibrant and come out cleaner because soft water leaves virtually no soap residue in the fabric.

Save Money: The Culligan Gold Series Softener practically pays for itself. The average family saves \$71.00 per month* because they use less soap, detergent, electricity, and gas for the water heater.

* "US Dept. of Labor, Bureau of Labor Statistics, 1989 Consumer Expenditure Survey;" adjusted to 2000 via Consumer Price Index.

Culligan®

The Benefits of a Culligan Home

Dissolved minerals in the hard water that enters your house form a scale that makes water heaters and other water-using appliances work harder than necessary. A Culligan Gold Series™ Water Softener conditions the water as soon as it enters your home and delivers soft Culligan® water throughout the entire house. Ask your Culligan Man™ to inspect your appliances for any hard water buildup or damage.

Bathrooms:

Bathing and showering will feel wonderful. Your skin and hair will improve. You'll spend less money on costly lotions and hair care products.

Cleaner Everything:

You'll spend less time cleaning because soap film won't stick to bathtubs, chrome fixtures, shower stalls, or doors.

It all starts here:

Raw, hard water enters your home, passes through the Culligan Gold Series Softener, and soft, conditioned water is delivered throughout the entire house.

Laundry Room:

Your clothes will look whiter and brighter, feel softer on your skin and last longer.

Kitchen:

Your glassware will be spot-free—dishes, flatware, pots and pans will sparkle. General kitchen cleanup becomes easier because soap rinses right off.

No Clogged Pipes

Hard water creates a buildup of scale in your plumbing. When pipes get clogged, water is delivered slower throughout your home. A Culligan Gold Series Softener delivers soft, conditioned water which doesn't promote scale buildup in pipes, offering you better water flow and saving you money on costly plumbing repairs.

Exclusive Culligan Gold Series™ Design and Technology

The Culligan Gold Series Water Softener is built with state-of-the-art features to deliver the finest conditioned water to your entire family.

The full-flow one inch system
meets plumbing standards and
allows you to run numerous water
sources simultaneously without
lowering the flow rate or pressure.

Bypass the System
The one inch Cul-Flo-Valv®
lets you bypass the system for
uses not requiring softened
water—such as watering
the lawn—without losing
pressure.

Service-free Operation
Exclusive, non-corrosive
5-cycle motorized control
valve directs water flow
during service and
regeneration cycles.

Maximum Efficiency
Cullex® resin provides
maximum water softening
capacity, stability and
long life.

Efficient Operation
High grade quartz
underbedding evenly
distributes water to
maximize flow rates.**

Save Salt and Water
The Culligan Soft-Minder® meter option
monitors daily water use and activates
regeneration only when needed, saving you
salt and water.

Fingertip Programming
The low voltage, fully programmable
Accusoft® Microprocessor offers
easy data entry performance options
that can be set at the touch of a
button, to meet individual needs.
All programming is safe from most
power interruptions and surges.

Soft Water for Everyone
Guest-Cycle™ recharge feature
provides an extra supply of
conditioned water when there
are more people than normal
in the home.

Longer Life
A Dubl-Safe™ brine refill control
provides assured shut-off and
corrosion-proof components for
longer life.

System Protection
A non-corrosive brine plate assists
in dissolving salt and protects the
system from salt impurities.

Culligan Exclusive Triple-lined Tank

Our Tripl-Hull™ mineral tank features a corrosion-resistant liner, sealed
within a rugged steel tank. The scuff-resistant exterior minimizes condensation
and corrosion and, best of all, offers a lifetime limited warranty.*

Save on Water, Salt and Electricity

The patented Culligan Aqua-Sensor® regeneration system option electronically monitors
hardness removal to activate regeneration only when necessary, conserving water, salt
and electricity, and saving you money.

*The Tripl-Hull tank is backed by the Culligan Limited Lifetime Warranty. The terms of product warranties vary and may be modified from time to time. Culligan will provide a copy of same upon request.

**Available only on 12 inch units.

*Quality products
and services you
can count on.*

When It's Built by Culligan, It's Built to Last.

For over 60 years, Culligan has led the water treatment industry in innovation and service. We offer the broadest product line, more than 200 patents and a global presence. From manufacturing the finest products to delivering expert service to your home or office, we're involved in every phase of your water treatment. Of course, Culligan® products are built to last and are backed by solid warranties* and the best trained and experienced service technicians in the industry.

Why Millions Trust Culligan to Deliver the Best Water

- ➲ We manufacture our own water conditioners, make our own tanks, mold our own plastic parts and build our own timers. No other water treatment company holds as many patents as Culligan.
- ➲ We're ISO 9001 certified. All assembly takes place under exacting quality control.
- ➲ Culligan conditioners possess the industry's most state-of-the-art features because we maintain our own extensive research & development facility with over 40 engineers and scientists.
- ➲ Our products are backed by the best service technicians in the industry. With over 1100 dealers worldwide, a Culligan Man is always nearby. No run-around for service!
- ➲ We have the expertise to correctly identify the necessary water treatment. Your local dealer is a trained specialist with the resources of the entire Culligan system at his disposal.
- ➲ We sell and service our products in more than 90 countries globally. Wherever you go, we're there to make sure you receive the Culligan water you've come to enjoy.

Solutions For Your Home and More

If you have questions or need assistance, your Culligan Man™ is a phone call away and ready to help. Call today and let one of our trained water technicians test your water. Feel good and live better with Culligan.

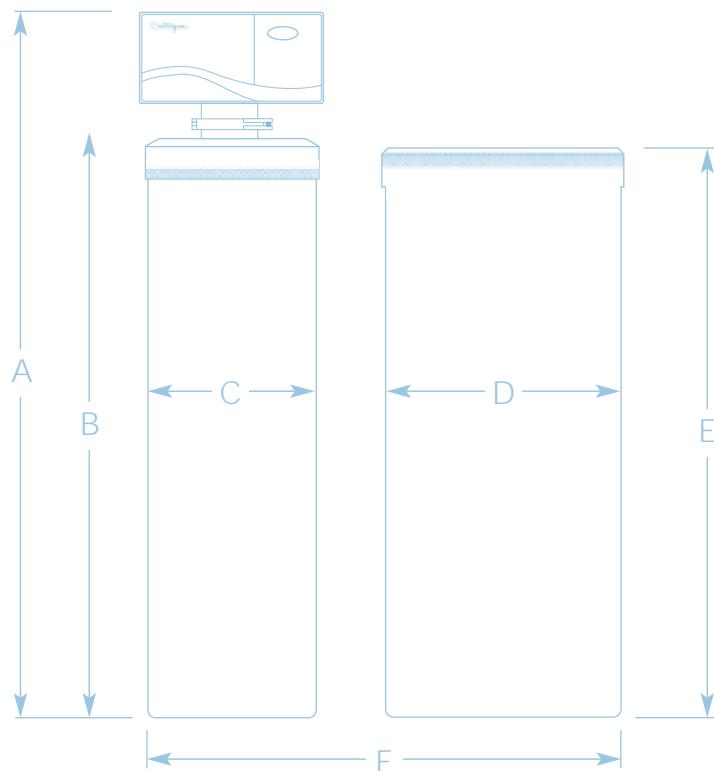

*Culligan will provide a copy of warranties upon request.

Culligan Gold SeriesTM Water Softeners
